OAKCREST FARMS

LOCATION: Shepard Hill Rd
Willis, TX 77378

ACREAGE: 12 Acres

SIZE: Main House: 4,154 sq. ft. — 3 bedroom, 3.5 baths
Cottage: 780 sq. ft. — 1 bedroom, 1.5 baths

DESCRIPTION:

Every so often an opportunity to own something “special” arises...

Welcome to Oakcrest Farms, 12 acres of tranquility in beautiful Montgomery County, near Lake Conroe.

The owners of this stunning offering took their time as they carefully planned their vision for their property. The main house was painstakingly detailed not just for aesthetic beauty but for efficiency as well. Details such as window placement, how the light plays through the house, and natural airflow. When you step inside, you can feel that this house is “one of a kind”.

The home was designed with a spacious entry, large living area with windows to capture the views, three bedrooms, three and one-half baths, spacious utility, pantry, closets and storage areas. Graced with a screened porch that creates quiet space to sit and overlooks the lower pasture where the horses and deer graze. Fireplaces create ambience in the living area and on the porch, the home is truly a sanctuary. There are so many special details to this home that it is best to see it in person!

In addition to the main house, the owners have remodeled what is believed to have been the original home on the property and transformed it into a charming one bedroom, one and a half bath cottage with the same crafted cabinetry. Flooring is woodgrain waterproof vinyl throughout. The use of space is the best I have seen. The custom cabinets and drawers in the kitchen offer an organized space for everything. The bedroom is spacious with a king size bed with floating nightstands. A laundry room is located immediately off the bedroom and bathroom. The bathroom has a walk-in glass shower, bamboo walls, and ample storage. A custom murphy bunkbed off the living area offers additional sleeping. The cottage opens to a front porch decked with rocking chairs and overlooking the land below. Gorgeous landscaping of both dwellings create bird and butterfly havens.

Nearby is a lovely building that houses the well and offers tool storage, along with a great woodworking shop that can be used as is or transformed into other uses! A tack and feed room offers additional storage and a covered alleyway adjoins this building with two stalls (which, along with a third extra stall at the back of the building, creates a barn area). Behind the stalls is a covered concrete wash rack with a stall that converts for grooming and an adjacent barnyard. The barnyard opens to a lane that leads to the lower pasture. Water and electricity are strategically placed on the property.

The last building on the property is an extra-large three stall stand-alone garage with two electric garage doors and a third manual. Behind this building is a covered porch to store firewood.

The lay of the land is beautiful with lush grasses and a wide variety of hardwoods. Several of the trees must be centuries old. The overall beauty of Oakcrest Farms would be pleasing to the most discerning eye.

CONSTRUCTION:

- Bedroom one and the two-story side of house, including garage, is constructed of Nudura Insulated Concrete Forms
- The office, living room and kitchen area are traditional wood construction
- The entire house is foam insulated and considered a sealed home
- All Marvin Windows with wood interior/ fiber glass exterior
- The roof is hurricane strapped

DETAILED FINISHES:
