Zoning

What zone is my property?

Sources: Department Of Energy, Environment And Climate Action

THINGS TO KNOW

Zoning helps organise cities and towns by dividing properties into specific land use types, such as commercial, residential, industrial, agricultural, and public-use. This structured approach prevents disorderly development, making cities and towns more livable, navigable, and attractive.

Zoning rules determine how land can be used and developed, including identifying desirable developments like townhouses or apartment units near public transport. Zoning may also impose restrictions on building heights to preserve local neighbourhood views.

Local area plans provide even more specific details to protect an area's unique character or encourage growth in suitable places. These plans can modify zoning rules and influence development possibilities, supporting economic growth, preserving local identity, providing open spaces, and improving transport routes.

Note: To determine the development possibilities for your property, it's essential to review the planning documents provided by local authorities, contact directly, or consult with a practising town planner.

Questions to ask

- What does the zoning and local plan mean for the property?
- What land uses are suitable for the applicable zone and/or local plan?

LEGEND

-  Farming Zone
-  General Residential Zone - Schedule 1
-  Transport Zone 2 - Principal Road Network

Easements

What access rights exist over the property?

Sources: Department Of Transport And Planning

THINGS TO KNOW

Easements are legal rights allowing a person or government authority to access a specific portion of land for a particular purpose. They are commonly required for the maintenance of utilities including large water and sewer pipes, stormwater drains, and power lines. Easements are also created for shared vehicle access through a property or for maintenance of built to boundary walls.

Easements are recorded on a land title and agreed to by the landowner at the time of subdivision. The easement remains on the title even if the land is sold to someone else. Typically, a landowner cannot build permanent structures within an easement area or obstruct the access of the authorised party.

Before building within or over an easement, you must obtain approval from the easement owner and should speak to a building certifier to understand any specific considerations.

Note: The map identifies only publicly registered easements provided by the relevant authority and is not a definitive source of information. You should order a certificate of title & survey plan from the titles office to be sure. Although rare, private covenants or agreements over the land may exist. If you have specific concerns about land entitlements, please contact a solicitor.

Questions to ask

- Does the easement benefit or burden the property?
- Who is responsible for the land within the easement area?
- What other impacts does the easement have on the design of my building?

Flood Risk

Is the property in a potential flood area?

THINGS TO KNOW

If your property is in a potential flood area, it's important to understand the possible risks, impacts and causes of flooding. Flooding commonly happens when prolonged or heavy rainfall causes waterways to rise, overflowing into nearby properties.

The likelihood of a flood is often described using Annual Exceedance Probability (AEP), which shows the chance of a flood happening in any given year. For example, a 1% AEP flood has a 1 in 100 chance of occurring annually.

Building, renovating, or developing in flood-prone areas may require government assessment. For instance, floor heights might need to be built above flood levels, or structures designed to allow water to flow beneath raised buildings.

It is important to check with your local authority (e.g. flood check report) to understand flood risks and access detailed information.

PROPERTY DUE DILIGENCE REPORT | 1 CASSINIA STREET

Note: Government flood risk models are broad guides that estimate flood probability and acceptable risk but don't guarantee site-specific accuracy or immunity. They are primarily developed by local authorities to govern future development on that sites to mitigate risks for residents. Newly subdivided lots may have already considered flooding risks and developed above acceptable flood risk levels rendering the mapping invalid. For specific concerns, consult your local authority, local flood check or a qualified professional.

Questions to ask

- What are the building requirements in a potential flood area?
- Can the flood risk be reduced through design measures?
- What is the probability of flooding and is this an acceptable risk for your plans?

LEGEND

 Selected Property

Character

Is the property in a character or heritage area?

THINGS TO KNOW

Heritage and character places are generally to be retained or restored to preserve their unique character value and charm. Any extensions or alterations to existing heritage buildings should complement the traditional building style of the area. There may also be demolition restrictions for existing heritage buildings.

If a property is identified in a character area, any new houses or an extension to a house **may** need to be designed to fit in with the existing building character of the area.

Note: It is not only houses or buildings that are protected by heritage values, there may be structures or landscape features on site that are protected by heritage values. It is essential to consult with the local authority, town planner or a building certifier for guidance on heritage places.

Questions to ask

- Is the property protected by Character or Heritage restrictions?
- What impacts do these restrictions have on renovations, extensions, or new builds?
- Is approval required for works under Character or Heritage restrictions?
- How does this consideration positively or negatively impact the property?

LEGEND

 Selected Property

Vegetation

Is the property in an area with vegetation protection?

Sources: Department Of Energy, Environment And Climate Action

THINGS TO KNOW

Properties located in protected vegetation areas may have tree clearing restrictions over the native vegetation or significant vegetation on the property. Your property may have vegetation protection if it:

- is located near a river, creek or a waterway corridor
- is located in a bushland area or rural area with native vegetation
- contains large significant trees even in an urban area
- the trees have heritage values and cultural sentiment

If these features are present, your property may contribute to the preservation of important environmental or cultural values. In these cases, planning controls may apply to help guide how vegetation is managed or how land can be developed.

Note: The map provided identifies areas that may have restrictions on tree clearing of native vegetation or significant. The mapping is based on broad modelling assumptions and does not assess each site individually. Newly subdivided lots may already have considered protected vegetation in the design of the subdivision and removal of vegetation approved by Council. To obtain accurate information about tree clearing and building on a site with protected vegetation considerations, it is recommended to contact your local Council or a local arborist for guidance.

Questions to ask

- Where is the protected vegetation located on the property?
- Is the identified vegetation "native" or an introduced species?
- How does this consideration positively or negatively impact the property?

LEGEND

-  Selected Property
-  Vegetation Protection Overlay - Schedule 3

Bushfire Risk

Is the property in a potential bushfire area?

THINGS TO KNOW

Being located in a bushfire risk area does not guarantee a bushfire occurrence but signifies that the property has been identified as having conditions conducive to supporting a bushfire. Factors such as a dry climate, dense surrounding vegetation, and steep landscapes all contribute to the impact and intensity of a bushfire.

If you plan to build or develop in a bushfire area, your construction may need to adhere to specific requirements to ensure resident safety. This could involve proper building siting, creating barriers and buffer zones around your home, and using appropriate building design and materials to minimise the impact of bushfires.

Note: The map provided is based on broad government modelling assumptions and does not assess each site individually or guarantee bushfire immunity.

Newly subdivided lots may have already considered bushfire risk in the design of the subdivision, potentially involving vegetation removal, and gained approval from the Council. You should speak with the Council or a building certifier to identify any relevant safety requirements for your site.

Questions to ask

- What is the significance of the bushfire risk to the property?
- What can be built in a bushfire risk area?
- Can bushfire impacts be reduced through design?

LEGEND

 Selected Property

Noise

Is the property in a potential noise area?

THINGS TO KNOW

Some properties may be located near uses that generate noise such as road, rail and airport traffic. These noise generating uses can cause some nuisance for the occupants of a building if it is loud and consistent. When building, extending or developing property in a noise affected area, you may be required to consider design features that reduce noise for the residents of the dwelling.

Common design features some local Councils may require include installing double glazing windows, noise attenuation doors and fences. You may wish to contact an acoustic engineer for more information.

Note: The map provided identifies noise based on government broad modelling assumptions and does not assess each site individually or any nearby sound barriers such as acoustic fences, buildings, vegetation, or earth mounds.

Questions to ask

- What is the significance of the noise impacts?
- How do noise impacts affect renovations, extensions or new builds?
- How can noise impacts be reduced through design?
- How might you confirm the noise levels and whether they are acceptable?

LEGEND

Power

Are there any power lines on or near the property?

Sources: Department Of Energy, Environment And Climate Action

THINGS TO KNOW

Power lines (overhead or underground) transmit electricity from power stations through cables to individual properties. It is important to locate these cables before digging or undertaking overhead work near power lines, to ensure they are not damaged or workers injured.

Note: The map provided identifies the general location of large power mains identified by the service authority. The location of cables and power lines in relation to the aerial or satellite image provided may be skewed because of the angle the imagery is captured from. The indicative cable location is provided as a guide only and not relied upon solely before undertaking work. Please contact the relevant Service Authority to find out further detailed information.

Questions to ask

- Where is the power infrastructure located on the property?
- Is there an electricity connection available to the property?
- What impact might this have on renovations, extensions, new builds or redevelopment?

LEGEND

-  Selected Property
-  Overhead Power Line (HV)

Data limitations

Is there any data I need to follow up?

Sources: Develo

THINGS TO KNOW

Develo sources its data from publicly available datasets provided by relevant authorities, including Federal, State and Local Governments. In some cases, these authorities may not publish data in an open or accessible format, or the data may not be available for certain areas, particularly in remote or rural regions.

Where known data limitations exist, such as when data is available but not published by the relevant authority, it has been marked in the map legend on this page. Users seeking this information are encouraged to **contact the relevant authority directly**.

The purpose of a Develo report is to compile relevant data to support the due diligence process. While every effort is made to ensure the information is accurate and up to date, limitations may still be present.

Develo and its data providers accept no responsibility for any inaccuracies or for decisions made based on the information in this report. Users should contact the appropriate authority for any data corrections or clarification or consult qualified property professionals before making financial decisions or undertaking development, renovation or new construction projects. Additional planning or building requirements may apply.

Winner of RateMyAgent's Agent of the Year for 2025, Leo Edwards brings a results-driven, digital-first approach to selling homes in Inverloch and the Bass Coast region. Today, Leo's innovative marketing strategies reach over 30,000 people weekly through curated social audiences, ensuring your property gets maximum exposure to qualified buyers who either love, or would love to live in Inverloch.

DISCLAIMER

This report is provided by Develo Pty Ltd as a general guide only and is intended to support due diligence when considering a property. While care is taken to compile and present information from a variety of reliable third-party sources, including government and regulatory datasets, Develo Pty Ltd makes no representations or warranties about the accuracy, currency, completeness, or suitability of the information provided.

Information displayed in this report may be derived from third-party data modelling, automated algorithms, and publicly available or licensed third-party datasets. All data is subject to change without notice and may not reflect recent developments, site-specific conditions, or council-approved amendments. Due to the limitations of digital mapping, imagery distortion, and third-party data dependencies, all spatial data, infrastructure locations, distances, and risk indicators are indicative only.

This report does not constitute legal, financial, planning, or building advice, and must not be relied upon as a substitute for independent professional advice. Readers should conduct their own enquiries and seek qualified advice from a solicitor, town planner, surveyor, certifier, or relevant authority before making decisions or relying on this information.

To the maximum extent permitted by law, Develo Pty Ltd disclaims all liability for any loss, damage, cost, or expense incurred by any person arising from any use or reliance on this report or the data contained within it, including but not limited to errors, omissions, or inaccuracies. No liability is accepted for decisions made on the basis of this report or its contents.

By accessing this report, you acknowledge and accept the above terms and assume full responsibility for verifying all information independently prior to undertaking any development, renovation, or transaction.

WHO ELSE COULD USE THIS REPORT

- ✓ Your mortgage broker and bank
- ✓ Your building and pest inspector
- ✓ Your conveyancing solicitor
- ✓ Your building professional consultant. eg. architect, designer and builder.
