CHANGE/EXPANSION OF USE OF AN EXISTING WELL

ISSUANCE OF THIS PERMIT DOES NOT CONFER A WATER RIGHT

CONDITIONS OF APPROVAL

1) This well shall be used in such a way as to cause no material injury to existing water rights. The issuance of this permit does not assure the applicant that no injury will occur to another vested water right or preclude another owner of a vested water right from seeking relief in a civil court action.
2) The construction of this well shall be in compliance with the Water Well Construction Rules 2 CCR 402-2, unless approval of a variance has been granted by the State Board of Examiners of Water Well Construction and Pump Installation Contractors in accordance with Rule 18.
3) Approved for a change of use of an existing well constructed under permit no. 149709.
4) Approved pursuant to CRS 37-92-602(3)(b)(I) and policy of the State Engineer under the following conditions for a 5 acre parcel known as Lot 24, Filing 1 of the Hills at Bayou Gulch subdivision, Douglas County.
5) The use of ground water from this well is limited to ordinary household purposes inside one single family dwelling, the watering of no more than four (4) large non-commercial domestic animals, and the irrigation of not more than 1 acre of home gardens and lawns, as recommended by the Division of Water Resources to the county commissioners.
6) Production from this well is limited to the Upper Dawson aquifer.
7) The annual withdrawal of ground water from this well shall not exceed 1 acre-foot.
8) The maximum pumping rate of this well shall not exceed 15 GPM.
9) This well shall be located no more than 200 feet from the location specified on this permit.
10) The issuance of this permit hereby cancels permit no. 149709.

NOTE: To insure a maximum productive life of this well, perforated casing should be set through the entire producing interval of the approved zone or aquifer indicated above.

NOTE: The ability of this well to withdraw its authorized amount of water from this non-renewable aquifer may be less than the 100 years upon which the amount of water in the aquifer is allocated, due to anticipated water level declines.
